

St Roch's is a school which operates with the consent of the Catholic Archbishop of Melbourne and is owned, operated and governed by Melbourne Archdiocese Catholic Schools Ltd (MACS).

## Purpose

This policy is aligned with the First Aid Policy for MACS schools. The policy sets out the actions and resources required in St Roch's to ensure adequate first aid provision for students, staff and others in the school environment and when engaged in school approved activities.

## Scope

This policy applies to students, staff, families and others at St Roch's.

## Principles

The following principles underpin this policy:

- our school has a responsibility to ensure a safe working and learning for all members of school communities
- the principal and all staff have a duty of care to all students and the provision of adequate facilities and resources supports this in the school.

## Policy

St Roch's is responsible for providing first aid assistance to students in the event of illness or a medical emergency.

### First aid facilities

The principal ensures that first aid facilities are in place to meet the needs of staff, students and others in school environments and for school approved activities, including for off-site activities such as camps and excursions, and out of hours school events. The area has appropriate signage and is readily identified as where first aid is provided. In this area, the First aid facilities are supervised by a first aid officer.

- the size and layout of the school – buildings, external areas
- high risk areas – technology and science laboratories, health and physical education facilities, performing arts facilities, workshops or maintenance areas, chemical storage areas
- the number of campuses
- the number of employees, students and others in the workplace
- known medical conditions of staff, students and others
- previous incidents or trends in illness or injuries
- the nature and location of camps, excursions and other off-site activities
- school vehicles
- proximity to medical facilities and access to emergency services
- proximity of hazards in the school or local environment.
- Where first aid facilities are located in the school or campus
- Medical support for students will become ill or who are injured at school

Sufficient staff must be trained under the provisions of the *Occupational Health and Safety Act 2004* (Vic.) to ensure adequate provision of first aid, based on the number of students in the school or engaged in the activities, the activities being undertaken and the school environment.

### First aid kits

First Aid kits are located in the First Aid Room and are regularly maintained by first aid officers.

#### Excursions, Camps, Sporting Events or Other 'Off-Site' Activities

- Staff members responsible for organizing excursions, camps, sporting events or other 'off-site' activities must ensure that the First Aid Kits to be taken to the event have adequate provisions for dealing with a blood spills or

loss of body fluid.

- First Aid Kits taken on excursions, camps, sporting events or other 'off-site' activities as a minimum must contain:
  - Hand wipes;
  - Disinfectant wipes;
  - Rubber gloves and disposable latex gloves;
  - Sterile un-medicated wound dressings;
  - A variety of bandages and tapes;
  - Plastic sealable bags;
  - Sharps containers.
  - procedures for yard duty and school approved activities

## First aid staff and training

All staff are to complete the refresher in Provide Cardiopulmonary Resuscitation (CPR) HLTAID009 each year.

All staff are to attend two briefings on anaphylaxis management conducted at the school by the anaphylaxis supervisors. In compliance with Ministerial Order 706, it is recommended that all Victorian school staff undertake the Australasian Society of Clinical Immunology and Allergy (ASCI) e-training course and have their competency in using an adrenaline autoinjector tested in person within 30 days of completing the course. Staff are required to complete this training every two years.

Training in the management of asthma is undertaken annually. Depending on student population, additional training in other medical conditions, such as diabetes or epilepsy may be recommended following the first aid risk assessment

First aid officers provide initial care to injured students, staff or others in accordance with their level of training. They are not required to diagnose conditions or provide ongoing medical assistance.

The principal or third delegate will ensure that designated first aid officers and general staff have completed the recognised training. A first aid officer with current first aid qualifications must always be available to respond and assist an ill or injured person.

Where appropriate, a first aid officer will refer the ill or injured person to additional medical advice or assistance.

Additional staff with relevant training must be available depending on the student population, proximity to medical facilities, and the nature of activities being undertaken.

Training for anaphylaxis management is undertaken by all staff in the school.

A register of all first aid training is kept in the school by the office manager

## Administration of First Aid

School staff are responsible for providing first aid assistance to students in the event of illness or a medical emergency.

Our school staff who have been trained will administer first aid in accordance with their training. Trained staff can provide basic first aid with [DRSABCD](#). In a medical emergency, staff take emergency action and do not need to obtain parent/carer consent to do so. Staff contact Triple Zero "000" for emergency medical services at any time.

On each occasion where first aid is administered to a student with a minor injury or condition, our school staff will notify parents/guardians/carers by contact details available at school. On each occasion where first aid is administered for a serious injury or condition, or in an emergency, school staff will attempt to contact parents/carers or emergency contacts as soon as reasonably practical.

School staff are to determine whether students presenting with infectious illnesses and their contacts require an [exclusion](#) period from school and abide by any minimum period in accordance with Department of Health.

### Administration of First Aid for head injury

For students who have an impact to the head, suspected concussion, or observed concussion, our school staff can use the [HeadCheck App](#) to help identify a suspected concussion.

If a student demonstrates symptoms of a [moderate to severe head injury](#) (neck pain or tenderness, double vision, weakness or tingling/burning in arms or legs, severe or increasing headache, seizure or convulsion, loss of consciousness, deteriorating conscious state, vomiting, increasingly restless, agitated or combative), the school is to call an ambulance immediately. If the [HeadCheck App](#) is used, the school must contact the parent/guardian/carer about the injury, even if the symptoms resolve. In the event of a suspected concussion, the parent/guardian/carer is

asked to collect the student and have a medical assessment.

If a student has been diagnosed with a concussion/mild head injury, our schools will act on medical advice where this is provided to support a return to school and associated activities including participation in sport.

## Communication with parents /guardians / carers

The school requires parents provide up-to-date and accurate medical information relating to students, including information about conditions such as anaphylaxis, asthma and diabetes. Parents are requested to provide this information annually, prior to camps and excursions and if the child's medical condition changes since the information was provided.

Records of incidents, injuries and first aid treatment are documented. First aid records are retained within the school and in line with MACS policies for information recordkeeping, retention and disposal.

An incident report will be completed when first aid is administered. This report will be kept in the school and a copy provided for the parent / guardian / carer of the student.

Parents / guardians / carers are notified as soon as possible if required to collect an ill or injured student from the school. When a parent / guardian / carer cannot be contacted, the principal will contact the emergency contact nominated by the parent / guardian / carer.

- Medical information is requested from parents / guardians / carers via Operoo annually and prior to camps, excursions or other school approved activities
- Parents will be notified after an incident, injury or when a student becomes ill at school

This policy and other school policies and procedures for the distribution of medication and management of students with medical conditions is published on the school's website

## Definitions

### First aid

The emergency treatment provided to employees, students and others who suffer injury or illness while at work / school, using the facilities or materials available at the time. In the case of severe injury or illness, members of staff are not required to diagnose or treat the condition apart from carrying out the appropriate first aid procedures. Diagnosis and treatment are the responsibility of the ambulance officer or medical practitioners.

### First aid officers

Staff members who have been trained in first aid and are designated to provide initial care of ill or injured staff, students or others.
